

CALL FOR APPLICATIONS

The fifth edition of the Vision Understanding and Machine Intelligence (VISUM) Summer School will take place between 7 and 14, July 2017, in Porto - Portugal. This year the following topics will be covered:

1. Computer Vision and Machine Learning
2. Computer Graphics
3. Deep Learning
4. Motion Analysis
5. Automatic Affect Recognition

World-renowned experts in the fields will deliver the courses, and the material covered will guide you in building your own AI system as a curricular project.

Aside from the theoretical relevancy of the topics covered, and the experience of building a practical AI application, the school aims to provide a stimulating opportunity for students, young researchers and professionals with interests in Computer Vision and Machine Learning. The participants will benefit from direct interaction with representatives from the most relevant industries in the field, as well as top academics.

TARGET AUDIENCE

In general, people that have been exposed to introductory topics of Computer Vision and Machine Learning will find this to be an excellent opportunity to grow their knowledge base. The target audience is therefore:

1. MSc and PhD students
2. Researchers and Post-doctoral scholars
3. Industry professionals

SPEAKERS

Vincent Lepetit, Technical University of Graz, Austria
