

## **Berlin Start-up seeks biologists for multiple open positions (senior and junior)**

**neuraltrain GmbH** is a newly founded digital health start-up based in Berlin developing innovative, digital, mental health solutions.

We are looking for biologist(s)/neuroscientist(s) for one of the current projects on a digital therapy solution in depression and affective disorders. Start dates are marginally negotiable although immediate availability (starting March, 2018) is strongly preferred.

### **Responsibilities:**

- Design, conduct, analyse and present research from the project
- In-depth literature review and meta-analyses; in particular, brain oscillations, psychophysics, depression, internet based therapy interventions are topics of relevance
- Identification and establishment of scientific collaboration with academic partners
- Writing reports, grants, publications in English (and German)

### **Qualifications and traits desired:**

- PhD in Neurosciences/ Cognitive Neurosciences/ Psychology/ Biology; **fresh graduates and post-docs are particularly encouraged to apply**
- Expertise in any of the following areas: neuronal oscillations, neurobiology of emotion, neurobiology of attention, psychophysics, perceptual learning. Programming and some app development experience is a strong plus
- Experience as an independent researcher in any of the above areas
- Knowledge of **Python** and/or willingness to learn, strong statistical and analytical skills
- Entrepreneurial mentality and an ownership/stakeholder attitude to get things done
- Knowledge of 'key opinion leaders' in depression and psychiatry, psychology, brain oscillations is a plus

**You do not have to match all the criteria to apply. We will assess your fit on a case by case basis. We are an equal opportunities employer and favour diversity.**

We offer a young, dynamic and dynamic working environment in a hip and exciting co-working space right in the heart of Berlin. We are a small, but growing team and are very well-connected in the Digital Health ecosystem. We offer enough flexibility to grow personally and professionally.

**Location:** Berlin

**Position:** Full-time

If you feel addressed by this job description, feel encouraged to get in touch at [chakrabarty@neuraltrain.de](mailto:chakrabarty@neuraltrain.de) with your CV and cover letter describing your motivation for the project and digital health.
