

SCHEDULE HIGHLIGHTS

WEDNESDAY

9:45 - 16:00

WORKSHOPS

- EEG Time frequency analysis by Mike X Cohen
- Inhibition in fMRI by Tomas Knapen

THURSDAY

9:45 - 16:00

SYMPOSIUM

- Statistical regularities and suppression
- Habit suppression
- Single cell recordings

POSTERS

- Poster prize for the best poster

FRIDAY

9:45 - 16:00

SYMPOSIUM

- Top-down control over attentional suppression
- Mobile approach-avoidance measurement
- Metacontrol

LUNCH

- Meet the presenters
 - Bernhard Hommel
 - Jan Theeuwes
 - Leonardo Chelazzi
 - Heleen Slagter
 - Leon Kenemans

EPOS/HELMHOLTZ SYMPOSIUM

INHIBITION WINTER SCHOOL

The Dutch Experimental Psychological Graduate Research School (EPOS) and the Helmholtz institute are happy to announce the winter school on “*inhibition*” held December 5-7, 2018.

The goal of this year’s meeting is to give EPOS and Helmholtz members and other researchers alike an introduction to and an overview of recent advances in the study of inhibition. On the first day of the meeting we offer beginner workshops on how EEG and fMRI methods can be used to study inhibition. On the two following days, experts from the field of attention, perception etc. will present their recent work on inhibition.

We also invite attendees to present their own work during our poster session or to join one of our experts during lunch in our “Meet the experts lunch” session!

Confirmed Speakers

Leonardo Chelazzi, Lotte van Dillen, Simon van Gaal, Bernhard Hommel, Leon Kenemans, Tomas Knapen, Pieter Roelfsema, Heleen Slagter, Jan Theeuwes, Matthijs Vink, Sanne de Wit.

Register Before Nov. 21!

via www.eposinhibition.nl

Free for EPOS and Helmholtz PhD students*

* a fee applies to all other reserachers. See the website for more details
