CALL FOR ABSTRACTS!

The Detroit Institute of Ophthalmology seeks abstracts for *The Eye, The Brain and The Auto* 9th World Research Congress. We will focus once again on both the driver's vision and visual needs, as well as on the role that the technology enabling autonomous mobility will play in healthcare.

We seek abstracts:

- Related to naturalistic driving especially as they focus on health, wellness, and driver functional assessment
- Related to driver's functional fitness especially as revealed by biometric sensing technology
- From the medical world, anticipating the role the technology enabling autonomous mobility will play in healthcare
- From the auto industry, as it foresees the role autonomous mobility will soon play in healthcare
- From the driving/vision research arena which has presented advances at this congress for two decades

Abstract Submission Deadline: August 15, 2020
