

Your help is needed

Learning to see: how do novices understand fMRI images?

We are currently researching the cognitive progresses used in understanding fMRI and how this can be used to support those new to the field. This includes identifying any challenges they face while learning.

We need your expertise to understand what skills are needed. We are currently recruiting experts in fMRI to take part in an online interview to discuss their experiences and share their opinions on some textbook images.

We would deeply appreciate your help if you have experience in working with, training and teaching those who are new to the field of fMRI

Interviews will be arranged to take place at a convenient time and date and will take place via Teams. Interviews will last 1 hour.

Your participation is entirely voluntary, but your input into this research is invaluable.

If you are interested in taking part, please email ttxes67@nottingham.ac.uk
