

## Fully funded PhD position: More than sleeps the eye

*The role of REM-sleep and eye movements on the trajectory of distressing memories*

Take the opportunity to apply for a **PhD position** in Cognitive Neuroscience with us!

We are looking for a PhD candidate to join our exciting project to explore how distressing experiences are shaped by eye movements and sleep.

The project is **fully funded** by SENSS, based at the **University of Essex** (Department of Psychology) and in collaboration with **SOMNOmedics AG**.

For more information and to apply (by **16<sup>th</sup> of February 2026**) click [HERE!](#)
